

## Drive Operational Efficiency with an Integrated Platform

In today's fast-changing healthcare environment, it's harder than ever to make a profit in medical billing. The good news is that one simple move — consolidating on to one software platform — can streamline your business, make life easier for your clients, and increase your revenue stream. Ready to increase your bottom line? Now is the time to adopt an integrated solution with Kareo.

### Improve workflows and productivity

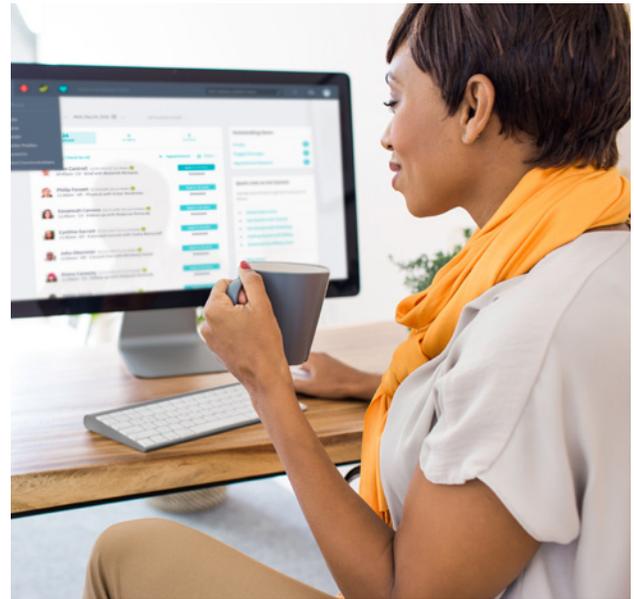

Optimize your staff's time by eliminating the need to bounce between different systems. Previously, having disparate systems from your clients would equate to a lot of manual data input. Now, Kareo's robotic process automation (RPA) solutions offer an intelligent, automated solution to pull in information and drive improved business outcomes.

Billing companies that leverage Kareo's integrated platform and RPA solutions saw:

- **50%** improvement in operational efficiency
- **90%** of claims processed automatically
- **95%** clean claims
- **2-3%** denial rates

### Drive speed to revenue

The less time it takes you to turn around a claim, the quicker you can submit it to payers — and get reimbursed. With a single robust system, you can also expect your claims to be cleaner, leading to fewer rejections.

### Increase profitability through data and analytics

Have better visibility into the financial picture of every account within your book of business. Holistic data analytics and reporting features help you identify weaknesses, assess performance, and troubleshoot issues for your clients.

### Focus on what matters — business growth

Increase your existing staff's bandwidth to take on strategic initiatives by making daily tasks more efficient. Focusing on a single system helps staff become proficient on a single workflow, helping them to develop into power users that are capable of performing advanced tactics with ease.

Your impact on clients' financial health will naturally build a solid reputation for your billing company — helping to drive steady growth to your business through referrals and word of mouth.
